

BOSS CLOSURES 38mm Milk Closure / FOIL

Boss Closures is pleased to present its patented tamper evident 38mm Bore Seal Milk Closure with foil seal made specifically to work efficiently with its patented new milk bottle neck design allowing the neck to be sealed with an induction foil seal and following peel of the foil applying a secondary seal by capturing the neck within the closure eliminating leaks.

This closure is specifically designed to be:-

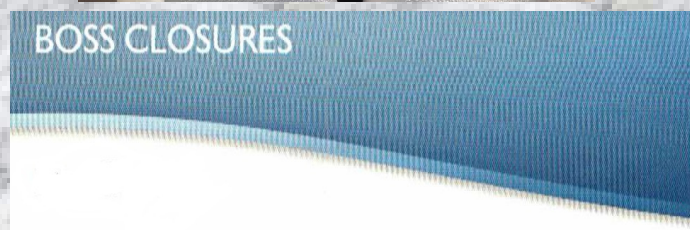

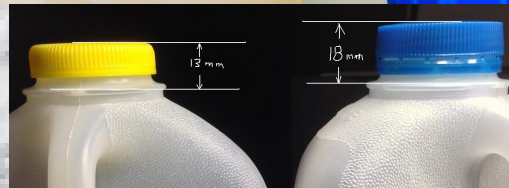

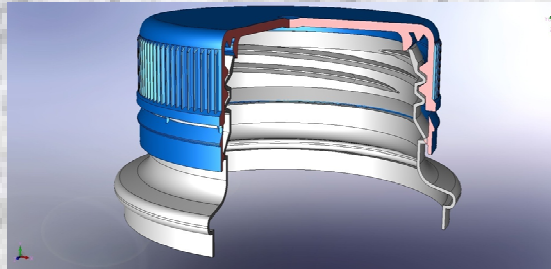

- Lightweight
- Fully Recyclable
- Low Cost
- Manufactured in Volume with low cost efficient production

Fully tested the closure allows a foil seal and manufacturers to still meet their obligations under

the National Packaging Covenant with all the

benefits of our standard closure

BOSS CLOSURES 38mm Milk Closure / FOIL

Made for Australian conditions the closure deals effectively with necks that may be out of round or damaged in transit by using the neck angle to always engage the foil seal assuring a leak proof seal.

Available in

- Printed designs if required.
- Your choice of color.

The neck design:-

- Allows a lighter weight bottle to be used.
- Is available in a peel and lift cover if required.
- Is available in 1, 2, 3, or 8 start threads.
- Has undergone significant testing on industry standard induction sealing machines.
